SWITCH.

AIM:

To study the behaviour of a switch by observing how it forwards data packets using cisco packet tracer

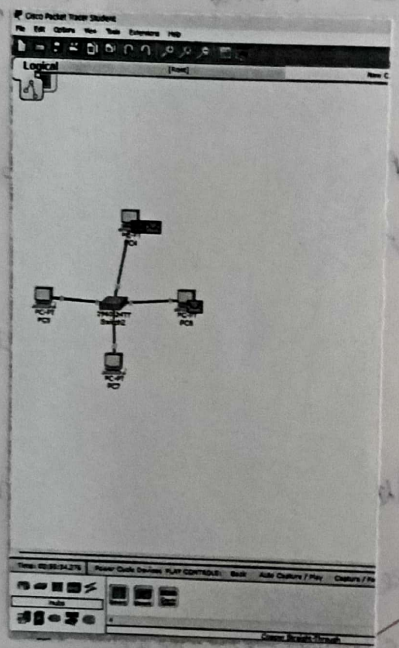

STEPS:

- Open Cisco Packet Tracer
- Drag and place 1 switch and 4 Generic PC's into the workspace.
- Connect all PC's to the switch using Copper straight - through Cables
- Configure IP addresses for all PCs in the same network
- Select Add Simple PPU from the Common tools bar
- Send a Packet from one PC to another PC
- Switch to simulation mode & observe

RESULT:

The switch forwards the Packet only to the destination PC by using its MAC address table. This reduces unnecessary network traffic and improves communication efficiency
